- A solid **understanding** of how web applications work. Including security, session management and best development practices
- Knowledge of **NoSQL** (preferable mongoDB) **DB systems** or **SQL** (yet again object oriented programming and web application development)
- **Straight problem diagnosis** and **creative problem-solving** skills
- Ability to work and thrive in a **fast-paced environment**, learn rapidly and master diverse web technologies and techniques
- At least **3+ years** of relevant experience
- **Support throughout the course of the project**, including the analysis, specification and design phases

- Understanding of **usability and graphical layouts** is an advantage
- **Bachelor's degree (or HTL)** in Computer Engineering and/or Computer Science

What can you expect:

- **Exciting projects** with technical variety
- **Flat hierarchies**, high **flexibility** & a lot of **creative freedom**
- Further **development opportunities**

About Plasmics

The start-up Plasmics transforms the landscape of ecological production. We aim to design, manufacture, sell and service the world's most promising additive manufacturing technologies. We want to provide customers the opportunity to manufacture made to measure solutions in specific quantities. We innovate for one of the fastest growing markets. Plasmics is committed to hire and develop unique talent from around the world for any discipline. Based in Vienna, Austria and in parts funded by state and EU funds we work to build an inclusive work environment focused on shared goals. We welcome people regardless of gender, race, religion or background to do their best work. Each team member is expected to challenge and be challenged, to create and to innovate beyond interdisciplinary borders. We're tackling the world's most promising technologies and the most important problems and aim our shared passion at making the world a better place. Please send your CV, an overview over relevant professional and personal projects and a letter of motivation!
